#### REMARKS

##### Reassignment

This patent application has been assigned back to its inventors, Stuart T. Spence and Harry L. Tarnoff. A copy of the assignment is included with this letter and is being filed with the USPTO on this same date. The previous assignees, DFR2000, Inc., were owners of 100% of the rights, title and interest in the invention, and have assigned 100% of the rights, title and interest in the invention to the original inventors.

##### Pro Se

In view of the fact that the individual inventors of this invention are now 100% owners of the rights, title and interest in the invention, they wish to prosecute any amendments to the application Pro Se. If, for any reason, this application is not found to be in full compliance with the applicable regulations, the applicants respectfully request constructive assistance from the examiner in correcting any such shortcomings.

**Office Communication mailed 2/25/2004**

The examiner has specified that Claims 1 – 37 are subject to restriction and/or election requirement. Specifically the examiner finds:

Claims 1-16 are drawn to an optical system, class 359 subclass 351

Claims 17-28 are drawn to a scanning device, class 348, subclass 96

Claims 29-37 are drawn to a portable telecine, class 359, subclass 663

**Restriction to single class and sub-class**

The inventors, who are now the assignees of record, request that the examiner cancel Claims 1-16 and Claims 29-37 so that he may limit his investigation to Claims 17-28 for a scanning device, drawn to class 348, subclass 96. This restriction should in no way be considered prejudicial to the validity of the canceled claims, and the applicants reserve the right to pursue them independently as allowed by the rules of the Patent Office.

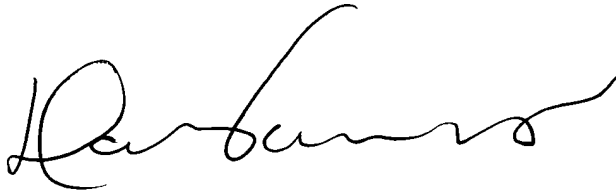

**Conclusion**

The applicants believe that the above restrictions should make the Claim set appropriate for investigation under a single primary class and sub-class, and that therefore the examiner should be in a position to proceed with a determination of the validity of those claims. If there are any further questions about this response, the applicants respectfully request that the examiner contact the applicants at the address shown below.

## Assignment of Rights: Patent Application

DFR2000, Inc., ("Assignor") is owner of "Optical design for film conversion device" as described in the U.S. Patent Application signed by Assignor on December 21<sup>st</sup>, 2000, U.S. Patent and Trademark office Serial Number: 09 / 747,180 (application #2002020024595), filed December 21<sup>st</sup>, 2000, and which claims the benefit of U.S. Provisional Application No. 60/172,111, filed Dec. 23, 1999 and U.S. Provisional Application No. 60/180,318 filed Feb. 4, 2000, (the "Patent Application"). Stuart T. Spence and Harry L. Tarnoff, as individuals who are also the named inventors, ("Assignee") desires to acquire all rights in and to the Patent Application and the patent (and any reissues or extensions) that may be granted.

Therefore, for valuable consideration, the receipt of which is acknowledged, Assignor assigns to Assignee 100% of his right, title and interest in the invention and Patent Application (as well as such rights in any divisions, continuations in whole or part or substitute applications) to Assignee for the entire term of the issued Patent and any reissues or extensions that may be granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisions, continuations in whole or part or substitute applications) filed claiming the benefit of the Patent Application and any priority rights resulting from the Patent Application.

Assignor authorizes the United States Patent and Trademark Office to issue any Patents resulting from the Patent Application to Assignee according to the percentage interest indicated in this assignment. The right, title and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Application and foreign counterparts; (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention in any and all countries.

Assignor: Ed Sanders

Date: 4-21-04

Ed Sanders, president DFR2000, Inc.
